Message from the Guest Editors

Dear Colleagues,

The development of the analog-to-digital converter (ADC) caused a massive increase in the measurement capabilities of commercial instruments. This initially led to digital readouts and later on, together with the development of the microprocessors and microcontrollers, to added functionalities and the implementation of complex digital processing techniques where algorithms are executed in the instruments.

The other major development that is the cornerstone of our day-to-day devices is the evolution of sensors to be used to measure every physical phenomenon that surrounds us.

The objective of this Special Issue is to publish recent research results related to the use of sensors in electronic measurement systems. Authors are invited to submit their research results where the topics include but are not limited to: Metrology and measurement science of sensors; Distributed measurement systems; Cyber-physical systems and IOT etc. For further information about the topics of interest, please visit:

Dr. Vittorio M.N. Passaro

Dr. Davide Brunelli

Dr. Raffaele Bruno

Prof. Dr. Roozbeh Ghaffari

Message from the Editorial Board

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access :— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed by the [Science Citation Index Expanded](#) (Web of Science), [MEDLINE](#) (PubMed), [Ei Compindex](#), [Inspec \(IET\)](#) and [Scopus](#).

CiteScore (2019 Scopus data): **5.0**; ranked 17/129 (Q1) in 'Physics and Astronomy: Instrumentation' and 147/670 (Q1) in 'Electrical and Electronic Engineering' and 70/300 (Q1) in 'Computer Science: Information Systems'.
